Register Books issued by the Committee of Lloyd's Register of Shipping

Lloyd's Register Book

The Register of Ships and List of Shipowners are issued annually in July and August respectively; the Appendix in January.

The Register of Ships (in two volumes A–L and M–Z) contains the names, classes and general information concerning the ships classed by Lloyd's Register of Shipping (including the British Corporation Register); also particulars of all known ocean-going merchant ships in the world, of 100 tons gross and upwards.

The second volume (M–Z) also contains lighters carried on board ship, floating docks, liquefied gas carriers, ships carrying refrigerated cargo, refrigerated cargo containers, refrigerated stores and container terminals classed with Lloyd's Register and off-shore drilling rigs.

The Register is kept up to date by means of cumulative monthly Supplements containing the latest survey records for all classed ships, and changes of name, ownership, flag, tonnage, &c., for all ships, whether classed or not. Each Supplement is accompanied by particulars of new entries to the Register—that is, new ships and ships of which the names have been changed.

A Weekly List of Alterations in the Register of Ships is also published.

List of Shipowners contains a list of owners and managers of the ships recorded in the Register with their fleets as well as lists of former names of ships and compound names of ships.

The Appendix contains lists of shipbuilders with existing ships they have built; marine enginebuilders and boilermakers; dry and wet docks; telegraphic addresses and codes used by shipping firms; marine insurance companies and marine associations.

Statistical Tables are issued gratis to Subscribers to the Register Book.

Column 2

Former Names

The figures following the former name of a ship indicate the year in which the change of name occurred.

Former names are retained in the Register throughout the life of the ship, and an index to these names is included in the List of Owners volume.

Owners

The name recorded in **bold type** is that of the registered owner.

Managers

The managers of the ship are recorded if desired.

Port of Registry

A port printed in *italic type* is the home port of a ship and is shown where there is no known port of registry.

Flag

Indicates the national authority with which the ship is officially registered.

Column 3

TONS

Gross tonnage

The gross tonnage printed in **bold type** is measured according to the law of the national authority with which the ship is registered.

This measurement is, broadly, the capacity in cubic feet of the spaces within the hull, and of the enclosed spaces above the deck available for cargo, stores, passengers and crew, with certain exceptions, divided by 100.

Thus 100 cubic feet of capacity is equivalent to 1 gross ton.

Net tonnage

Derived from the gross tonnage by deducting spaces used for the accommodation of the master, officers, crew, navigation, propelling machinery and fuel.

For some ships not sailing under the British flag, the gross and net tonnages have been measured in accordance with British rules and are accepted under British law. In such cases the gross and net tonnages are printed in *italic type*.

Deadweight

The weight in tons of 2240℔ of cargo, stores, fuel, passengers and crew carried by the ship when loaded to her maximum summer loadline.

Shelter deck ships

OSD/CSD in column 6 indicates that the ship is a shelter-decker having arrangements for facilitating ready conversion from the open to the closed shelter deck condition or vice-versa. In the open condition the greater part of the upper 'tween-decks space is exempt and not included in the tonnage; in the closed condition the upper 'tween-decks space is included and consequently the tonnages in the CSD condition are greater than in the OSD. When available, tonnages for both conditions are recorded in the Register, the smaller (OSD) tonnages printed above the larger (CSD) tonnages.

T.Mk (Tonnage Mark)

T.Mk in column 3 indicates that the ship has a Tonnage Mark painted, in addition to the Load Line marks, on each side of the ship aft of the Load Line Disc. In its simplest form the Tonnage Mark is a horizontal line with an equilateral triangle standing vertex down on it.

In cases of this kind when two sets of tonnages are recorded the set of smaller tonnages applies when the ship is not loaded beyond the draught indicated by the horizontal line of the Tonnage Mark, and the set of greater tonnages applies when the ship is loaded deeper

T.Mk (Tonnage Mark)—*Continued*.

than that draught; the Load Line Disc is positioned higher on the ship's sides than the Tonnage Mark. The difference between the two sets of tonnages is in accordance with amended Tonnage Regulations now in force for some countries under which tonnages may be measured either excluding the greater part of the upper 'tween-decks space even without a tonnage hatch in the upper deck, or including the upper 'tween-decks space.

In other cases only one set of tonnages is recorded. In these the horizontal line of the Tonnage Mark on the ship's sides is level with the deepest load line; the ship may not therefore load beyond the draught indicated by the horizontal line of the Tonnage Mark. The tonnage is exclusive of the greater part of the upper 'tween-decks space and the draught is less than the maximum allowed under the Load Line Convention.

Ore/Oil carriers

Two gross and two net tonnages are also recorded, when available, for a ship which is designed to carry either ore or oil cargoes.

100A1	Character of sea-going iron or steel ships classed with Lloyd's Register.
A1	Character assigned to ships intended to trade within sheltered waters such as harbours, rivers or estuaries. Prior to 1948 this character was also assigned for limited sea-going service.
A1	Character of wood or composite ships. The number prefixed to the character indicates the term of years for which the ship is at present classed.
Cont. or Rest	Indicates continuation or restoration of class after the original term of years has expired. A number of years suffixed to the character, thus –8 yrs, indicates the period of extension granted.
1	The figure **1** in the character signifies that the ship has equipment of anchors, chain cables and hawsers in accordance with, or of a standard equivalent to, the Rule requirements for sea-going ships classed for unrestricted service or has equipment which is acceptable to the Committee for a special or restricted service. If, by reason of the ship's service, normal equipment is considered to be unnecessary, the figure **1** may be omitted from the character of classification.
–	This sign in the position usually occupied by the figure **1** indicates that the equipment of the ship is not in accordance with the full tabulated requirements, but is acceptable for the particular service.
with freeboard with fbd	Signifies that the freeboard assigned is a condition of the ship's class. The scantlings of ships built since 1949 are based upon a specified draught and this notation is no longer assigned.

HULL

Date of build

For a ship built under the supervision of Lloyd's Register surveyors, the year and month recorded indicate the date of completion of the Special Survey during construction.

When there has been an unduly long interval between the launching and the completion or commissioning of the ship two dates are recorded prefixed by Lch. and Cmpl. or Cmd. The abbreviation Recmd. means recommissioned.

Shipbuilders and Place of build

This records the shipyard where the hull of the ship was built, and not the contractor who accepted the order, nor the yard where the ship was fitted out.

Overall length

The extreme length in feet and inches of the ship as reported by the owners or obtained from other reliable sources. When this measurement is followed by the notation incl. BB in parentheses, this indicates that the ship has a bulbous bow and the overall length recorded includes any protrusion of that bow. If the extreme length is not available the registered length, as given on the ship's Certificate of Registry, is recorded in italics thus *235·7'*.

Extreme breadth

The extreme breadth is the maximum breadth to the outside of the ship's structure and in paddle ships includes the paddle boxes.

Maximum draught

In most cases this is the maximum summer draught amidships, but in some ships of special construction the maximum draught is at the after end, and this figure is recorded. For ships employed on the Great Lakes and rivers, whose freeboards are assigned by Lloyd's Register, the summer draught in fresh water is inserted followed by the letters FW.

For OSD/CSD ships, the summer draught in the open condition is recorded, followed by the draught in the closed condition.

For ships to which tonnage marks have been assigned, as indicated in column 3, the draughts recorded are those at the tonnage mark and the summer (maximum) load line respectively.

Length B.P. (between perpendiculars)

The distance in feet and inches on the summer load waterline from the fore side of the stem to the after side of the rudder post, or to the centre of the rudder stock if there is no rudder post.

Holds—*Continued*

G.	Grain capacity in cubic feet. The capacity of cargo spaces, measured to outside of frames, to top of ceiling and to top of beams, including hatchways. (Insulated spaces are not included.) For a part Container ship the figure does not include spaces allocated to containers.
B.	Bale capacity in cubic feet. The capacity of cargo spaces, measured to inside of cargo battens, to top of ceiling and to underside of beams, including hatchways. (Insulated spaces are not included.) For a part Container ship the figure does not include spaces allocated to containers.
In.	Insulated capacity in cubic feet. Bale capacity of the insulated spaces in ships having refrigerated cargo installations. It is measured from the face of overhead, 'tween deck and tank top insulation lining, or the surface of 'tween decks where uninsulated; or from the face of brine pipes or air ducts; from the face of permanent cargo battens or air screens or air coolers or casings. Deductions are made for floor gratings which are part of the air circulation system, for pillars, stanchions and other fixtures which interfere with the cargo-carrying capacity, but not for loose or portable floor dunnage, or for portable bins or trays and their supports. The insulated spaces are not included in the grain and bale capacities.

Containers

For a Container or part Container ship the following information is recorded and is given by the owner or obtained from other sources which are believed to be reliable.

Hatchways

Weather deck hatchways only are recorded. The sizes are given in order, where possible, commencing at No. 1 from forward.

Measurements to the inside of coamings are recorded. Where two hatchways can be combined to form one large hatchway, only the combined size is given, and the two hatchways counted as one. The total length is followed by the abbreviation "comb". Measurements are given to the nearest quarter of a foot. Unless otherwise stated, all hatch covers are made of wood.

Ha	Hatchway(s)
(alu)	Aluminium
(irn)	Iron
(stl)	Steel
(w)	Wood
comb.	Combined

Winches, Cranes, Derricks

W	Winches (prefixed by the number of winches). Cargo winches only are recorded, and not those used for other purposes.
Cr	Cranes (followed by the number of cranes and, in parentheses, the stated safe working load in tons of 2240lb).
Der	Derricks (followed by the number of derricks and, in parentheses, the stated safe working load in tons of 2240lb).

Total Horsepower

For engines classed under Lloyd's Register or British Corporation rules, the horsepower recorded is the total maximum designed horsepower approved. In ships not classed with the Society the horsepower recorded is the total maximum service horsepower as reported by the owners or obtained from other reliable sources.

In diesel-electric or turbo-electric machinery, the total horsepower of the oil engines or turbines is recorded, together with the shaft horsepower of each electric motor.

bhp	Brake horsepower (oil engines)
ihp	Indicated horsepower (steam reciprocating engines)
shp	Shaft horsepower (turbines and electric motors)

Type

The type name of an engine is recorded when it has been built under licence.

Fuel Bunkers

The capacity of the bunkers is recorded in tons, followed by an indication of the fuel for which the machinery is fitted, as stated by the owners.

(c)	Burning coal
(d.o)	Burning diesel oil
(hvf)	Fitted for burning high viscosity fuel
(o.f)	Oil fuel

The coal capacity is the estimated capacity of all permanent bunkers. The oil fuel capacity is the estimated capacity of all spaces, including double bottom spaces, which are permanently fitted for the carriage of oil fuel and which have permanent provision for its use on board. The capacity of settling tanks is included. For tankers the tonnage of fuel used in one day is recorded thus: 4½pd (per day). This figure is as stated by the owners.

Auxiliary electrical generating plant

The number of generators is given, followed by the kilowattage and voltage of each generator, the number of cycles (if an a.c. installation) and the type of current (a.c. or d.c.).

Emergency generators and sets used solely for harbour purposes are not recorded.

Special propellers

Only special type propellers are recorded, that is: directional, controllable pitch and thwartship thrust propellers. The fitting of propellers both forward and aft is also indicated.

Speed in knots

The speed recorded is that which the ship is stated to be capable of maintaining at sea in normal weather and at normal service draught.

Boilers

Information about boilers is recorded only for ships classed with Lloyd's Register or the British Corporation. When details of boilers are recorded in parentheses thus: (AuxB 100℔) this indicates that the boiler is temporarily out of use.

a	Aft
AuxB	Boiler(s) supplying steam to auxiliary services essential to the operation of the ship at sea; but not supplying steam to the main propelling machinery
c	Centre
cf	Corrugated furnaces
Comp	Composite
db	Domestic boiler(s) supplying steam for purposes not connected in any way with the operation of the ship at sea. Only recorded when working pressure and heating surface exceed 50℔/sq. inch and 50 square feet respectively.
DB	Double-ended boiler(s)
(el)	Electrically heated
e(ex.g)	Exhaust gas economiser
(ex.g)	Exhaust gas (boilers)
f	Forward
hs	Heating surface. The figure recorded is the total evaporation surface of boilers in square feet plus the total surface of superheaters plus half the surface of economisers and is used for calculating the fees for periodical surveys of water tube boilers. Where the figures are recorded in parentheses they may represent only the heating surface of the boilers
